

Interview with Robert F. Kennedy Jr. Alleges Longstanding, Ongoing US Violation of the Biological Weapons Convention (BWC)

The Most Massive Coverup in World History and Harbinger of Humanities End?

August 15, 2023 *How a US Government directed false-flag Anthrax attack a week after 9/11 led to erasing the US Constitution and Bill of Rights, and was used to restart wildly illegal gain-of-function bioweapons research in violation of the [BWC](#).*

Below the reader will find a portion of an interview by Tucker Carlson, wherein RFK Jr. makes it crystal clear the US will lose a war with Russia, the US is looking forward to an economic depression vastly worse than the 1929 Great Depression, the US illegally restarted gain-of-function bioweapons research, and directed [referring to Galveston National Laboratory (GNL) funded by the National Institute of Allergy and Infectious Diseases (NIAID)] research in Wuhan that directly led to the COVID-19 pandemic.

This writer never typed out an interview such as below before, however, this one was of particular interest, given RFK Jr. is exceedingly well connected in the US intelligence community, and the implications of this interview are devastating for all humans should his information be correct.

That he is an intimate with DC insiders is demonstrated by his downplaying of the dangers of bioweapons, e.g. use of the word “bug” that trivializes gain-of-function pathogens, a useful convention when schmoozing with insiders, and use of the word “team” in the following statements: “So, in order to deploy one offensively, you need a vaccine to counter it. So, you need to vaccinate your team before you deploy it.” As if using teams to deploy biological weapons is already written into the American military playbook. Who

Review of Social Justice – Anti-Empire news publications – Not-for-profit

exactly has he been talking with? It sounds like military insiders who have plans to deploy biological weapons. Whatever the case, one must congratulate him for his honesty and courage in disclosing these clear and present dangers to the entire world.

Where is the International Criminal Court (ICC) NOW?

If any member state of the ICC were to file a referral for criminal investigation to the ICC, that would **1)** lead to key individuals including President Biden, Anthony Fauci, Ralph Baric and dozens if not hundreds of other US officials to life imprisonment and more importantly **2)** end the ongoing alleged but painfully obvious illegal US [violations of the BWC](#) via the US gain-of-function research that created COVID-19.

Failure of the ICC to act with lightening speed now – for the first time since its inception, will potentially lead to the end of civilization as we know it, and possibility all of humanity.

American government impunity to all international laws and treaties must end, and if this issue, with more than six million dead already, is not enough to start that process, nothing will. It appears only appealing to the “enlightened self interest” of ICC members themselves, and their families, might make the difference, and American gain-of-function research does definitely threaten everyone on earth, including members of the ICC and their families. The US Department of so-called Defense is a threat to every living person, as COVID-19 proved. Even [Lancet](#) Medical journal appears to agree.

Transcript of Interview with RFK Jr. by Tucker Carlson 7:21 am August 15, 2023

RFK JR.: Their (Russian) nucs are better than ours. They can shoot down our nucs. We can't shoot down theirs.

"We cannot win this war." Anyone who thinks Russia cannot win this war, go look at the Netflix documentary on Stalingrad, and look at the sacrifices Russians are willing to make.

Putin today, we thought this was going to hurt him, (but) he's more popular than he's ever been. The US polling firms show him polling at 90% popularity... (33.05) we were going to break him with the sanctions, we did the opposite. We made him more powerful.

He's now insulated from trade and the international banking system. He's now got this great trade agreement with China. He's now engineering the creation of BRICS, with 40 leading nations of the world turning against the US currency as the reserve currency... that is the worst threat against the United States.

If we lose that status as the world's reserve currency, the Great Depression (1929) will look like a cakewalk.

TUCKER CARLSON: I just don't see how the Secretary of State, how the president, and his advisors can't have come to the same conclusion. What are they thinking?

RFK Jr.: Unfortunately I think, and I share your share of mystery about that - the only way I can explain it... but President Biden has always been a very pro-war president. He was the one president that [stood out supporting the Iraq War](#)... Biden has always been a reliable 'let's go to war kind of guy.' I don't think to the extent that he's thought this all through. It's consistent with his historical instincts. And then he's surrounded by people who are the same people that got us in the Iraq War.

“We were tricked into Iraq by the Neo-cons who told us that Saddam had something to do with the World Trade Center (9/11) which was a lie; (and that) he had planted the Anthrax attack that came five days after the World Trade Center, which was a lie. That turned out to be the US intelligence agencies and US military from Fort Detrick. That Anthrax, the FBI found came from Fort Detrick.”

So (it was really) someone in the US government. Patrick Leahy and Tom Daschle who were the two Senators in the week after 9/11 who were trying to block the Patriot Act and it (the Anthrax attack) shut down Congress and it went through...

Yes, the FBI after a year investigation traced the Anthrax. It was a kind of Aims Anthrax that was weaponized and the only source of that in the world could be the US government and they traced it to Ft. Detrick, yes, the biolab in Ft. Detrick; the CIA lab in Ft. Detrick...

[See: <https://www.washingtonpost.com/archive/politics/2002/04/20/anthrax-spores-escape-a-lab-at-ft-detrick/0bc7ff58-022c-4ab3-9e76-0c3c99a77ee4>]

What does the Patriot Act do? Two things, it basically gets rid of large parts of the US Constitution and Bill of Rights, and allows spying by intelligence agencies on the American people, and it reopens the bioweapons arms race. Bioweapons were shut down in 1969 by - Nixon did this incredible thing and said we're shutting down bioweapons and got everyone to sign a treaty, in 1973. The Patriot Act has a provision in it that says we're not walking away from the Geneva Convention, which makes you a hanging offence to develop bioweapons, we're not walking away from the bioweapons charter of 1972-1973 but we are adopting a new rule that any federal official who violates those acts can not be prosecuted – so effectively it reopened (that research).

Review of Social Justice – Anti-Empire news publications – Not-for-profit

TUCKER: Victoria Nuland kind of blithely announced during Congressional testimony last year that by the way we have these biolabs in Ukraine. And that was kind of ignored, and people who covered got attacked for covering it, but the fact remains there are US biolabs in Ukraine. And why would we have biolabs in Ukraine?

RFK JR.: Because we're developing bioweapons and those bioweapons are using all kinds of new synthetic biology and CRISPR Technology and genetic engineering technologies not accessible in previous generations and can make frightening, frightening stuff.

(38:26) What happened was when we walked away from, and reopened the biological arms race in 2001 the Pentagon began putting a whole lot of money into it – bioweapons – but they were nervous at that time because if you violate Geneva Conventions it's a hanging offense, and they weren't sure that that provision in the Patriot Act would actually hold up as a loophole to treaties that had been ratified by Congress. So they were nervous about actually going full-force into bioweapons development. So they transferred the authority for biosecurity to the National Institute for Infectious and Allergic diseases run by Anthony Fauci. (39:17)

So [Anthony Fauci](#) called in all responsibility for biological weapons development... He got at that time a 68% raise from the Pentagon in order to do that work. And that's why he was the highest paid official in the American government. There are four million people in the American government, and he gets more money, \$450,000 a year – than the president, any Supreme Court Judge, any member of Congress. He was the highest paid, and its because he got that 68% raise from the Pentagon to do bioweapons – when you do bioweapons development – every bioweapon – he needs a vaccine. They develop them side by side. In 100% of the cases when you deploy a bioweapon there's blowback – your side also gets sick. So, in order to deploy one offensively, you need a vaccine to counter it. So, you need to vaccinate your team before you deploy it.

So those two things are deployed through a field of science called “gain-of-function” science where you take an infectious microbe and you amplify its infectivity. So, it may kill monkeys it may kill humans. And you adopt it that way. And there's all kinds of methods – you make it immune to antibiotics and therapeutic drugs – so its actually the inverse of medicine. For 2,800 years since Hippocrates doctors have been trying to figure out how to make microbes less infectious, and less deadly, and develop antibiotics and therapeutics to do that. There's 36,000 what are called life scientists, but they're actually death scientists who are now employed full-time in developing microbes that will – that can be used to kill people.

TUCKER: Given the experience we just had three years ago, where a virus from a biolab...

RFK Jr.: Let me give you a brief history about what happened. In 2014 three of those microbes escaped... we have a fortune in labs all over the country, in [Galveston](#), in Boston,

Review of Social Justice – Anti-Empire news publications – Not-for-profit

everywhere there are BSL 4 labs. We don't even know how many there are. BSL 3 and BSL 4 we haven't any idea how many. I have a new book counting the ones we know, but there are many secret ones that people don't know about and they're doing it here in the United States.

In 2014 three bugs escaped from three different labs and they were high profile breaks and they were very dangerous, smallpox and a couple of other bad bad microbes. The public learned about it and there was a lot of publicity and Congress held hearings. Three hundred scientists wrote to President Obama and said you've got to shut down Anthony Fauci because he's going to create a microbe that will cause a global pandemic. And so Obama signed a moratorium that shut down the 18 worst of Anthony Fauci's experiments – where most of them were taking place in Galveston, and North Carolina by a scientist called Ralph Baric down there. And instead of obeying that law, Anthony Fauche shifted a lot of his operations off-shore and most of those operations ended up in the Wuhan lab, a military lab, and let the Chinese Liberation Army... and a lot of them went to the Ukraine so a lot of that science now, and it's funded – Fauche was funding lots of it but then the other government agencies had to get confidence in their ability to get away with it, and most of it is being funded by the Department of Defense. Most of all – the biggest funder is USAID which is a CIA cutout.

TUCKER: Do you think the lab leak was a leak, or was it intentional?

RFK Jr.: The best science shows that – indicates that the people that were working on a particular corona virus that was taught by Ralph Baric – was developed by the US government – NIH money. It was then taught to a group of scientists Xi Shen Li who is called the Fat Lady, and her Assistant Ben Hu, and a couple of other scientists at the Wuhan Lab; Baric taught them two things, he taught how to engineer a spike with a furin cleavage site (PRRAR) that could attach to the (?) receptors in human lungs and make people sick, and spread through the air.

He taught them another trick, that has nothing to do with public health – a technique called [seamless ligation](#) which is a technique for disguising the evidence of human tampering so you can make the microbe and then you can erase the evidence that human beings actually made that microbe. Ben Hu was leading that research. Ben Hu got sick with two other of his fellow researchers and they ended up in the hospital with COVID symptoms in November of 2019. And it appears, the subway line that goes from the Wuhan lab straight to the airport – all the original cases were along that subway line. And so the intelligence agencies that are actually being honest about that and most of them are not, believe that Ben Hu and two other researchers – in the most likely scenario – were working on infectious coronavirus bioweapons – got sick – and they didn't know it and were riding that subway line every day and infecting people every day – before they actually got symptoms - and that's probably what happened, but nobody knows.

Review of Social Justice – Anti-Empire news publications – Not-for-profit

TUCKER: You’ve said many times publicly that CIA had – at best - knowledge of your uncle’s assassination...

COVID-19 Variant Resurgence, July – August 2023

WHO’s August 10, 2023 report overview

Globally, nearly 1.5 million new COVID-19 cases and over 2500 deaths were reported in the last 28 days (10 July to 6 August 2023), an increase of 80% and a decrease of 57%, respectively, compared to the previous 28 days. While five WHO regions have reported decreases in the number of both cases and deaths, the Western Pacific Region has reported an increase in cases and a decrease in deaths. As of 6 August 2023, over 769 million confirmed cases and over 6.9 million deaths have been reported globally. Currently, reported cases do not accurately represent infection rates due to the reduction in testing and reporting globally.

<https://www.who.int/publications/m/item/weekly-epidemiological-update-on-covid-19---10-august-2023>

In other words,

- 1) a rapid spike in COVID-19 cases, however,
- 2) the new variants *might* not be as deadly as before, however,
- 3) due to a reduction in testing, nobody really knows.

Nations are not vigorously testing any more. It appears economic devastation from previous rounds of COVID-19 has decreased governments’ willingness to even test for a resurgence.

Thus, the world remains vulnerable to a sneak attack from what appears to have been a US engineered deadly pathogen. Nations on the US least favored list, and all Muslim nations, not to exclude “battle-ground” states, regardless as to American pretensions, should be warned especially given most US gain-of-function research farmed out abroad has exponentially increased since 2019. Likewise, it does not require BSL-3 or BSL-4 labs

Review of Social Justice – Anti-Empire news publications – Not-for-profit
to test the efficacy of different variants on any test population. All it requires is one individual cold-blooded enough to release such a pathogen into a population.

Cocaine and Amphetamine use increases the number of individuals lacking normal human empathy.

Brain scan study uncovers why cocaine and methamphetamine may impair moral judgment, by

US Congressional Coverup

The US Congress, supposedly researching this matter is covering up both evidence and their own activities, as demonstrated by the *absence* of correspondence (CENSORED) here:

<https://oversight.house.gov/letter/letter-to-kristian-andersen-professor-department-of-immunology-and-microbiology-scripps-research/>

That letter was referenced in this article:

<https://usrtk.org/covid-19-origins/how-fauci-scientists-with-wuhan-ties-persuaded-covid-natural-origin/>

Who profited from the crime of creating the COVID-19 pandemic?

Big pharma, that's for sure.

Pfizer accused of pandemic profiteering as profits double -
Drugmaker makes \$37bn in vaccine sales and predicts bumper year
ahead from Covid jabs and pill - Tue 8 Feb 2022

Pfizer made nearly \$37bn (£27bn) in sales from its Covid-19 vaccine last year – making it one of the most lucrative products in history – and has forecast another bumper year in 2022, with a big boost coming from its Covid-19 pill Paxlovid.

Review of Social Justice – Anti-Empire news publications – Not-for-profit

The US drugmaker's overall revenues in 2021 doubled to \$81.3bn, and it expects to make record revenues of \$98bn to \$102bn this year.

The bumper sales prompted accusations from campaigners of "pandemic profiteering". The group Global Justice Now said the annual revenue of \$81bn was more than the GDP of most countries and accused Pfizer of "ripping off public health systems".

The Covid jab Comirnaty, which the New-York based pharma firm developed with the much smaller German company BioNTech, brought in \$12.5bn in revenues in the final quarter of 2021, taking the total for the year to \$36.8bn. Pfizer said it had exceeded its target of manufacturing 3bn doses of the vaccine last year...

<https://www.theguardian.com/business/2022/feb/08/pfizer-covid-vaccine-pill-profits-sales>

Create a problem just so you can solve it! That's an old "tried and true" political and business trick. "There's a sucker born every minute," as animal slave master P.T. Barnum is reported to have said.

How did China react to all that death and chaos? They sent more COVID-19 medication and protective gear to the developing world than any other nation, while Europe and US hoarded. Then, in an unprecedented move, they nationalized the pharmaceutical companies.

So is the US "Defense" industry gearing up for another pandemic? One can bet they are!

If President Trump, not exactly the model of youth, health and fitness can survive COVID-19, odds are just about any rich guy can. As for the poor?

What's the difference between Chinese socialism and American unrestrained capitalism?

In China, the government can still control their big corporations and thus they don't go around starting wars and pandemics.

In the US, big money and corporations totally won the politicians.

And that has become much worse since the SCOTUS decision *Citizens United vs. FEC*. Now, with [unlimited anonymous political "donations"](#) totally legal, the US is even more of a rogue mass-murderer than ever before.

They don't have to win a war to profit from it, and that's what American global politics is all about. Was the killing of six million innocents via the COVID-19 pandemic worth it? "Yes!" as far as shareholders in big pharma are concerned. "NO!" as far as everyone else is concerned.

Review of Social Justice – Anti-Empire news publications – Not-for-profit

What about the million Americans that died? As RJK Jr. also pointed out in his interview, media consolidation has resulted in [six companies](#) owning almost all of the media in the US. And so, the whole world revolves around the quarterly dividends earned by those rich enough to own stocks, while the innocents die, often alone, impoverished and [too often](#) uncoun-
ted.

Is there bias in RFK Jr. interview?

Generally speaking, it's excellent. However, it is true, and highly likely he has some bias against the CIA given reasonably credible evidence they may have murdered his father and uncle, added to the ongoing cover-up of critical information. He has strong evidence of motivation, methods and opportunity.

It's interesting however he only mentioned "Ukraine" in regards to bio-weapons research once in the selected portion transcript above, however, he mentioned Ben Hu, with that "suspiciously Chinese sounding name" four times. He seemed to go awfully light on the whole Hunter Biden's corrupt business dealings with Ukrainian gas company [Burisma](#) and especially Metabiota, a Department of Defense contractor specializing in research on pandemic-causing diseases that could be used as bioweapons.

<https://www.dailymail.co.uk/news/article-10652127/Hunter-Biden-helped-secure-millions-funding-military-biotech-research-program-Ukraine.html>

Also see: <https://usrtk.org/biohazards-blog/virus-hunter-siphoned-funds-for-global-virome-project/>

RFK Jr. also failed to emphasize in that interview the cover-ups of Metabiota's illegal research by the FBI. If one types "Hunter Biden" into the NY Post news website no less than [3,526 results emerge](#) (as of this writing) and the evidence is extremely strong the Biden family was most certainly heavily invested in, and profited hugely from illegal (if the BWC treaty has any meaning) by international law, bioweapons development. If and when a Republican gets into the White House and appoints an attorney general with integrity, individuals at the top of the FBI will no doubt be prosecuted for knowingly influencing the Trump/Biden 2020 election. The modifying phrase "if and when" is used above to indicate it is this writer's strong opinion, democrats cannot afford to have a Republican president because so many of their top cabinet appointees are over their heads in corrupt dealings going back to and including the [Clinton Foundation](#), and thus are knowingly promoting racial and political extreme divisiveness within the US and globally so as to ensure such chaos follows at the tail end of this administration's reign, civil and world wars are likely to emerge. That however, is contingent upon the Republicans coming up with a credible candidate; something they have not yet done. In any case, RFK Jr. appears to be covering up to some extent his own party's malfeasance

Review of Social Justice – Anti-Empire news publications – Not-for-profit
in the COVID-19 pandemic while overstating some obscure Chinese researcher’s potential role.

Given that COVID-19 appeared in [Italy before China](#) hammering on Wuhan appears biased.

Also see: <https://www.medicalnewstoday.com/articles/sars-cov-2s-spread-was-the-virus-circulating-in-europe-before-it-was-found-in-china> &

<https://www.projectveritas.com/news/military-documents-about-gain-of-function-contradict-fauci-testimony-under>

If anything, Chinese medical authorities should be congratulated for identifying COVID-19 and successfully containing it, rather than being painted as the villain as former President Trump so effectively did. Had the world emulated the Chinese government’s response, there would have been no global pandemic, and at least five of the six million killed, not have been killed.

If the US could have fielded a worthy socialist candidate in the 2000 election, there may not have been a pandemic at all as there would be no bio-weapons research, or war in Ukraine or Cold War. But that was and remains impossible as long as Wall Street - the location of [America’s largest slave market, past and present](#), dominates the American and global political landscape.

Is this writer biased? My mom came from the same “Boston Irish blue-blood” clan as the Kennedys. On the other hand, it was JFK that hugely escalated the war in Vietnam, so I don’t have rose-colored sun-glasses in regards to the Kennedy family either. In many ways JFK was an amazing and great president, whereas in others very terrible.

According to the latest [published news](#) as of this writing (8/16/23), RFK Jr.’s poll ratings are dropping with (war-criminal) Joe Biden spiking up “from 70 percent support to 72 percent in the last two months.” War criminal? The Iraq War, that he played a decisive role in starting, [was illegal according to UN](#) Secretary General at that time, [Kofi Annan](#).

How much of all this does the voting public in the US know? Very little. The concept of “[manufactured consent](#),” by the consolidated media in the US and other “democracies” is incredibly powerful. Most people never even heard of the [social justice genre of Alt-news](#) due to extreme and extremely illegal US government sponsored censorship (that failing to prosecute via the Patriot Act – see above interview - does *not* make legal).

Also see: <https://www.theguardian.com/commentisfree/2023/mar/17/iraq-war-20-years-later-us-forgetting-ukraine-russia>

Last by not least, in this writer’s opinion, RFK Jr.’s [unwavering support for Israel](#) and tragic lack of empathy for 75 years of heinous crimes committed against the Palestinian people, make him unfit to be a US president.

Review of Social Justice – Anti-Empire news publications – Not-for-profit

That however does not mean he is wrong about the origin or COVID-19 or the murders of his father and uncle. It may however explain part of his failing poll numbers. *As working Americans more and more become like the Palestinians, robbed and murdered by a police state, their empathy increases.*

In sum, is RFK Jr. and the interview biased? Everyone is. The only important question to this writer is: Does he respect human life, dignity, and self-determination as per the original UN Charter? The answer is: In some areas yes, and in other equally critical areas, no. And when moral compromises are made in critically important areas, it's a slippery slope to the bottom.

The International Criminal Court Must investigate allegations regarding the origin of COVID-19

The substantive allegations of innumerable violations of the BWC by the US in the US, Ukraine, and possibly Wuhan under the direction of the Galveston National Laboratory (GNL) funded by the US National Institute of Allergy and Infectious Diseases (NIAID) cannot be ignored given the 6,908,156 people killed by COVID-19 as of August 16, 2023. These allegations must be investigated by the ICC.

Were I in President Putin's shoes, I would post all the evidence of US gain-of-function that allegedly took place in Ukraine on a massive internet site, and no doubt his intelligence services have collected an enormous amount of evidence during the war there.

There are at least two approaches anyone can take to encourage an ICC criminal investigation. Message your friends that work in government in any of the following countries with a link to this article.

1) Referral by a signatory nation,

All nations that have ratified the Rome Statue of the International Criminal Court. Message your friends that work in government in any of the following countries with a link to this article.
